E.P.A.
Attention: Jose E. Torress
Dallas, Texas

Mr. Torres,

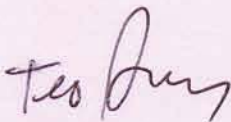

Please find enclosed water sample data of 3 Garcia Hill Water wells in 1988. The handwritten report was obtained from Elizabeth Cumberland who obtained it from her Mother, Irene Cumberland. MR. Pelizza admitted during cross examination during our contested case hearing that the report looks like reports done by URI during that time. Thought Mr. Mark Pelizza, from URI., did not question the authenticity of the origin of the handwritten report (URI), he stated that he could not tell which of the 3 Garcia water wells the data came from in 1988. Since Garcia Hill only had 3 water wells at that time, the 3 water wells tested were the 3 water wells that existed in 1988. Please compare the data from these wells with recent data.

I am requesting an investigation into the contamination of Garcia Hill wells on behalf of all the families that live their. We also object to any expansion of the Aquaphor Exemption of land in Kleberg County to allow additional uranium mining. We also ask that EPA intervene by temporarily removing the aquaphor exemption for the area of the Production Authorization 3 until an investigation can be conducted.

While reading the files send to me by EPA pursuant to by FOI request, I noticed how some staffers had great concern for Uranium contamination of water wells adjacent to the Uranium mining when the expanded aquaphor exemption was being reviewed. Their worst fears have been realized. Mark Pelizza has repeated stated that uranium in Garcia Hill water wells were their during Christopher Columbus's time. Data that I am enclosing disputes this assumption.

I am available at any time if additional information is needed.

Thank you,

Teo Saenz
